Deep View Enterprise Platform

Accelerate your data labelling projects with AI

Au-Zone Technologies Inc.

Data Management & Enrichment

Enhanced Data

Model Training

Feedback

Trained Model

Model Analytics

Model Validation

Target Edge Devices

Model Deployment

Deployable Model
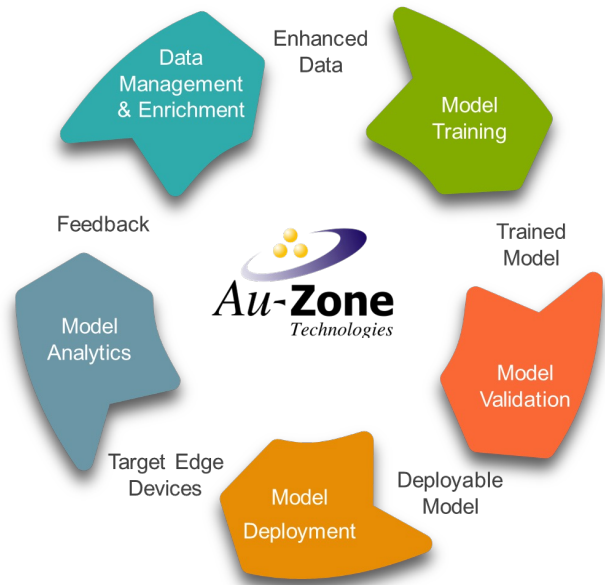

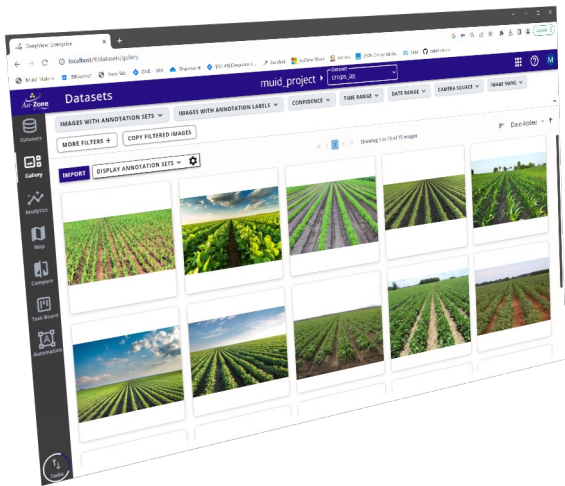

AI Assisted workflow to gather, curate and annotate datasets accelerating your model deployments on Edge devices

| Features	Benefits

▪ Data import
  ▪ Automated / Manual data import
  ▪ Streams, Videos and Images
	➢ Effortless integration of different datatypes
	➢ Time saving through automation

▪ AI Assisted Annotation for
  ▪ Detection models
  ▪ Segmentation models
  ▪ Tracking models
	➢ Annotate 10,000 images in 24 hours
	➢ 4X faster auditing
	➢ 5X cost saving in generating detection datasets
	➢ 20X cost saving in generating Segmentation datasets

▪ Dataset Enrichment and refinement	➢ Iteratively grow datasets from small number of images and a seed model
▪ Model Training	➢ Optimize of reference model before Edge deployment ➢ Visualize results and optimize model convergence
▪ Dataset Audit	➢ Allow distributed teams to work on datasets simulations ➢ Share dataset across uses ➢ Track progress of audit and labelling tasks
▪ Edge Deployment	➢ No Code deployment target hardware ➢ Pre-built workflows for Maivin, Jetson AGX and other platforms
▪ SAAS subscription model	➢ No setup, installation or configuration ➢ Register and start developing datasets and models

5 – 20x savings in real world projects

Intelliview Technologies

Au-Zone's DeepView Enterprise platform has been an extremely effective tool for accelerating the completion of our annotation efforts on a large collection of images and video from our thermal and colour cameras. Not only is the AI assisted auto-annotation a huge time saver, but we also see great value in the auditing and workflow management features which ensure high quality annotation from a team of collaborators. Accurate and reproducible annotations are the pillar of good results for training our AI-models, and DeepView Enterprise delivered.

Shane Rogers, CTO
