

Deep View Enterprise Platform

Accelerate the deployment of embedded AI solutions

AI Assisted workflow to accelerate your model deployments on edge devices - populate, curate and annotate datasets.

Features	Benefits
<ul style="list-style-type: none"> No code deployment to hardware Pre-built workflows for NXP Rockchip, Nvidia Jetson and other SoC platforms 	<ul style="list-style-type: none"> Simpler edge integration that reduces development time, cost and risk
<ul style="list-style-type: none"> Wide Data types: image, video, radar, point cloud, #D bounding box, IMS, GPS Automated / Manual data import 	<ul style="list-style-type: none"> Effortless integration of different datatypes Time saving through automation Reduction in manual effort through bridge-in and bridge-out API.
<ul style="list-style-type: none"> AI Assisted Annotation for <ul style="list-style-type: none"> Detection models Segmentation models Tracking models 	<ul style="list-style-type: none"> Annotate 10,000 images in 24 hours 4X faster auditing 5X cost saving in generating detection datasets 20X cost saving in generating Segmentation datasets
<ul style="list-style-type: none"> Dataset enrichment and refinement 	<ul style="list-style-type: none"> Iteratively grow datasets from small number of images and a seed model
<ul style="list-style-type: none"> Model training built in 	<ul style="list-style-type: none"> Optimize of refer model before edge deployment Visualize results and optimize model convergence Lowers risk, minimizes time
<ul style="list-style-type: none"> Dataset Audit 	<ul style="list-style-type: none"> Allow distributed teams to work on datasets simulations and share dataset across uses Track progress of audit and labelling tasks Reduce development risk, improve efficiency
<ul style="list-style-type: none"> SAAS subscription model 	<ul style="list-style-type: none"> No setup, installation or configuration Register and start developing datasets and models

Automated Workflows - Lower Development Time & Cost

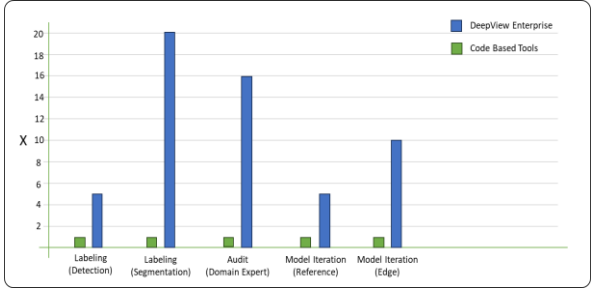

Analysis and Reporting

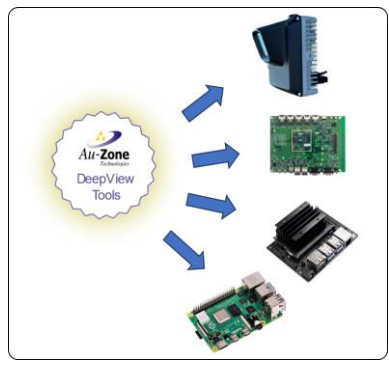

Datasets Visualization

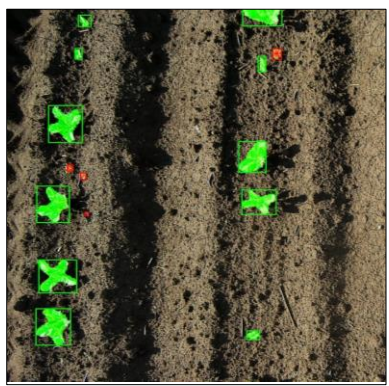

5 – 20x savings in real world projects

Edge Hardware Deployment

AI Assisted Segmentation

Intelliview Technologies Testimonial

Au-Zone's DeepView Enterprise platform has been an extremely effective tool for accelerating the completion of our annotation efforts on a large collection of images and video from our thermal and colour cameras. Not only is the AI assisted auto-annotation a huge time saver, but we also see great value in the auditing and workflow management features which ensure high quality annotation from a team of collaborators. Accurate and reproducible annotations are the pillar of good results for training our AI-models, and DeepView Enterprise delivered.

Shane Rogers, CTO
